Advising Role:

I really like advising students! I provide a welcoming, respectful environment where students feel comfortable, know that I am interested in what they have to say, and understand that I am here for them. My role as an Academic Advisor is to help students identify and assist them in reaching their academic, educational, and career goals. We come up with a plan and strategy to do this together. Helpful resources and information are provided, as well as referrals, if needed. I want students to feel supported, empowered, and know that I want them to be successful! When roadblocks present themselves or their plans need to be revised I will help them.
