

Dear Campus Community,

At Triton College, we are committed to our mission of valuing the individual, educating and serving our communities with dignity and respect. In times of uncertainty and navigating change, education remains a powerful tool for growth and opportunity. We know that pursuing an education is more than just earning a degree—it's about developing the knowledge, skills, and confidence to make a difference in an ever-evolving world.

Please know the college leadership is continuously reviewing and analyzing federal executive orders, etc., and will provide information relevant to the impact on institutional programs and services, policy and practice if and/or when it occurs. We recognize that every student at Triton College has a distinct journey, where every learner brings their own experiences and strengths, and we are here to support our students and campus community every step of the way.

Our institution offers a multitude of resources designed to support one's education and wellness. Among those resources, I want you to be aware of [counseling and wellness support](#) and [undocumented student resources](#). You may feel free to contact your area supervisor or VP with questions and concerns.

Education is an investment for both the individual and the future of our communities. Triton is committed to empowering students to achieve their educational goals, particularly in times of uncertainty and change that may implicate institutions of higher education. I truly believe every educational milestone reached brings our students closer to new opportunities and greater confidence.

With that, I wish to express great appreciation for your work on behalf of our students and I fully encourage you, and may you encourage others, to take advantage of the resources available to our campus community.

Sincerely,
President Moore
